

ARSHVINTH SAKTHIVEL

Gender: Male | **Phone:** (+94) 765461511 (Mobile) | **Email address:** arshvinths@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/arshvinth-sakthivel-7ba0942a9/> | **GitHub:** <https://github.com/Arshvinth> | **Portfolio:** <https://arshvinth.github.io/arshvinth-portfolio/> | **Address:** Mount Lavinia, Colombo, Sri Lanka (Work)

● ABOUT MYSELF

Software Engineering undergraduate currently pursuing a BSc (Hons) in Software Engineering degree at SLIIT (Graduating 2027) with Hands-on experience developing web and mobile applications using Java, Python, Node.js, React.js, and React Native. knowledge of REST APIs and database integration with continuous exposure to full-stack and machine learning academic projects. Seeking a Software Engineering Internship to apply academic knowledge in building practical, scalable solutions.

● EDUCATION & TRAINING

30/04/2023 - Current - MALABE, SRI LANKA

BSC (HONS) IN INFORMATION TECHNOLOGY SPECIALIZED IN SOFTWARE ENGINEERING (CGPA: 3.62) - SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT)

Field(s) of study:Software development

20/01/2021 - 20/01/2022 - COLOMBO, SRI LANKA

AAT 3 STAGES - PASSED FINALIST - ASSOCIATION OF ACCOUNTING TECHNICIANS

Field(s) of study:Business and Financial accounting

G.C.E. ADVANCED LEVEL - COMMERCE STREAM - HIGHLANDS CENTRAL COLLEGE

● SKILLS

Programming Languages

JavaScript | Java | C++ | C | Python | Kotlin

Web & Mobile Development

React Native | React | Spring Boot | Node.js | Express.js | CSS | HTML | Tailwind CSS

Databases

MongoDB | MySQL | Microsoft SQL Server

Tools & Testing

Git | JIRA | Postman | Selenium | Jest | Playwright | Figma

Data & AI

Pandas | NumPy | Data Preprocessing | Prompt Engineering

DevOps & Containerization

Docker | Kubernetes

● PROJECTS

17/04/2026

NexaMed Smart Health (Microservices) – Backend & Deployment Engineer (Doctor, Telemedicine, API Gateway)

Tech Stack : Node.js, Express, MongoDB, Docker, Kubernetes, REST, React, Tailwind CSS, Git

- Developed core microservices: doctor-service (profile, prescription, availability, patient reports) and telemedicine-service, following modular and scalable design.
- Built and integrated the API Gateway for secure, unified client-to-service communication.
- Established project structure and best practices for maintainability and scalability.
- Deployed all microservices using Docker Compose and Kubernetes, enabling robust, production-ready orchestration.
- Implemented RESTful APIs with authentication and error handling.
- Enabled seamless client-to-backend communication and service discovery.
- Authored API documentation for service interfaces.
- Collaborated in Agile teams using Git for version control and code reviews.

Rural Transport Management System – Booking & Payment Module Developer (Web App)

Tech Stack : React, Node.js, Express, MongoDB, Stripe, Twilio, REST, Jest, Artillery, Tailwind CSS, Git

- Designed and implemented the complete booking module for bus and train services, including real-time seat availability and validation to prevent double-booking.
- Developed payment management using Stripe Checkout for secure, seamless transactions.
- Integrated Twilio SMS for automated passenger notifications on booking confirmation, updates, and cancellations.
- Built booking state management (Pending, Confirmed, Cancelled), including admin workflows for confirming or cancelling bookings with reason tracking.
- Applied database indexing and transactional logic to ensure atomic seat reservations per trip.
- Developed RESTful APIs following Layered Architecture (Controller–Service–Repository) and SOLID principles.
- Wrote comprehensive unit and integration tests with Jest; validated system performance using Artillery.
- Collaborated in Agile teams using Git for version control.

Smart Health – Medical Record Management Module Developer (Mobile Application) **Tech Stack:** React Native, Node.js, MongoDB, REST API, Git

- Developed a medical record management module enabling staff to retrieve patient history and update vital information securely.
- Implemented digital card scanning with voice command support for both registered and unregistered patients, improving patient identification workflow.
- Applied SOLID principles to design maintainable and scalable components.
- Achieved 80% unit test coverage using automated testing to ensure reliability and reduce defects.
- Collaborated in an Agile-based development environment with version control using Git

Illegal fishing reporting web & mobile app - Researcher component **Tech Stack:** React, React Native, Node.js, MongoDB, REST API, Git

- Enabled researchers to submit species requests, mark favorites, and search by name or protection level, with detailed views enhanced by Cloudinary images and Wikipedia data, complemented by an analytics dashboard presenting illegal fishing report trends and overall species data through interactive graphs and charts for research insights.

● **CERTIFICATIONS**

10/10/2024 SLIIT

Dean’s List certificate - Year 1 Semester 2

04/01/2026 SLIIT
